Assessment Proforma 2024-25

Key Information

Module Code	CMT501
Module Title	Team Project
Module Leader	Ian Cooper / Carl Jones
Module Moderator	Xianfang Sun
Assessment Title	Team Presentation (Video Submission)
Assessment Number	1
Assessment Weighting	60%
Assessment Limits	Team 20min video

The Assessment Calendar can be found under ‘Assessment & Feedback’ in the COMSC-ORG-SCHOOL organisation on Learning Central. This is the single point of truth for (a) the hand out date and time, (b) the hand in date and time, and (c) the feedback return date for all assessments.

Learning Outcomes

The learning outcomes for this assessment are as follows:

1. Identify and implement solutions for a non-trivial technical problem working as part of a development team, employing appropriate project and risk management skills.
2. Use appropriate processes and apply relevant principles and practices from the discipline.
3. Select and apply appropriate best practice, software/hardware theory and technology to solving specific problems, from investigating and defining the problem to selecting appropriate techniques and validation methods in developing solutions.
4. Critically evaluate solutions and findings resulting from the project against the stated objectives and present them and the resulting deliverables in an appropriate professional manner.
5. Consider and apply appropriate legal, social, ethical and professional frameworks that apply to the given project.

Submission Instructions

The coversheet can be found under ‘Assessment & Feedback’ in the COMSC-ORG-SCHOOL organisation on Learning Central.

All files should be submitted via Learning Central. The submission page can be found under ‘Assessment & Feedback’ in the module on Learning Central. Your submission should consist of multiple files:

Description		**Type**	**Name**
Coversheet	Compulsory	One PDF (.pdf) file	Coversheet.pdf
Video file of a team demo of project	Compulsory Team submission	One video file, nominally 20 min long	[TeamName]Demonstration.XXX

If you are unable to submit your work due to technical difficulties, please submit your work via e-mail to comsc-submissions@cardiff.ac.uk and notify the module leader.

Assessment Description

During the module you will undertake a team project. The project will be decided during the first few weeks of the module.

This may involve development of some tangible piece of software, hardware, system design or theoretical result. This need not necessarily be a usable finished product. Instead it could be, for example, an extension to an existing system or a prototype built as part of a feasibility study. The project will be undertaken in response to the needs of a ‘client’: an academic or industrial partner who will be involved in specification of the project. You will also be allocated a project supervisor.

You will be expected to work as a self-organising team, agreeing the use of appropriate processes, self-directed learning, and peer review of other team members’ work. The team will research and analyse the problem then develop a suitable set of requirements and deliver a solution.

The project allows you to show individual creativity and originality whilst working with other team members effectively to co-ordinate your work. Students will be expected to apply appropriate knowledge, skills and techniques taught throughout the degree programme to further your oral and written communication skills, and to practise investigative, problem-solving, management and other transferable skills.

Peer review will be used in this assessment to help evaluate individual contribution to the final team outcome. Individual allocation of marks for the team component may be adjusted based on this peer-review.

Assessment Criteria
Criteria is presented as a proposal. Finalised criteria will be co-created during week 1 as the project is being decided.

The project will be submitted as a 20 minute video presentation.

Criteria	Fail	Pass	Merit	Distinction
15% Pitch	Unstructured. Participants confused.	Understandable, participants follow the majority of the content.	Good, aimed towards participants level of understanding.	Professional, pitched at correct level for participants.
15% Content: how the project was showcased.	Inaccurate.	Some functionality accurately presented.	Most functionality accurately presented.	Project presented to its full, without exaggerating functionality
70% Project as demonstrated…	… fails to address reasonable expectations.	… addresses reasonable client expectations.	meets most realistic expectations of client.	meets and exceeds realistic expectations of client and supervisor.

Help and Support

Help and support during the assessment will be provided by the supervisor alongside any general help classes provided in the school for summer students.

Feedback

Feedback will be provided within 4 weeks of submission and will be useful for dissertation modules.
