Assessment Proforma 2024-25

Key Information

Module Code	CMT501
Module Title	Team Project
Module Leader	Ian Cooper / Carl Jones
Module Moderator	Xianfang Sun
Assessment Title	Individual Report
Assessment Number	2
Assessment Weighting	40%
Assessment Limits	1500 words

The Assessment Calendar can be found under ‘Assessment & Feedback’ in the COMSC-ORG-SCHOOL organisation on Learning Central. This is the single point of truth for (a) the hand out date and time, (b) the hand in date and time, and (c) the feedback return date for all assessments.

Learning Outcomes

The learning outcomes for this assessment are as follows:

1. Identify and implement solutions for a non-trivial technical problem working as part of a development team, employing appropriate project and risk management skills.
2. Use appropriate processes and apply relevant principles and practices from the discipline.
3. Select and apply appropriate best practice, software/hardware theory and technology to solving specific problems, from investigating and defining the problem to selecting appropriate techniques and validation methods in developing solutions.
4. Critically evaluate solutions and findings resulting from the project against the stated objectives and present them and the resulting deliverables in an appropriate professional manner.
5. Consider and apply appropriate legal, social, ethical and professional frameworks that apply to the given project.

Submission Instructions

The coversheet can be found under ‘Assessment & Feedback’ in the COMSC-ORG-SCHOOL organisation on Learning Central.

All files should be submitted via Learning Central. The submission page can be found under ‘Assessment & Feedback’ in the module on Learning Central. Your submission should consist of multiple files:

Description		**Type**	**Name**
Coversheet	Compulsory	One PDF (.pdf) file	Coversheet.pdf
Report	Compulsory Individual report	One PDF (.pdf) file	[StudentNo]_Report.pdf

If you are unable to submit your work due to technical difficulties, please submit your work via e-mail to comsc-submissions@cardiff.ac.uk and notify the module leader.

Assessment Description

During the module you will undertake a team project. The project will be decided during the first week of the module.

This may involve development of some tangible piece of software, hardware, system design or theoretical result. This need not necessarily be a usable finished product. Instead, it could be, for example, an extension to an existing system or a prototype built as part of a feasibility study. The project will be undertaken in response to the needs of a ‘client’: an academic or industrial partner who will be involved in specification of the project. You will also be allocated a project supervisor.

You will be expected to work as a self-organising team, agreeing the use of appropriate processes, self-directed learning, and peer review of other team members’ work. The team will research and analyse the problem then develop a suitable set of requirements and deliver a solution.

The project allows you to show individual creativity and originality whilst working with other team members effectively to co-ordinate your work. Students will be expected to apply appropriate knowledge, skills and techniques taught throughout the degree programme to further your oral and written communication skills, and to practise investigative, problem-solving, management and other transferable skills.

Your 1500-word report will detail aspects of this project and discuss the critical assessment of individual and team outcomes.
You should section your report as described below.

Sec.1 (400 words) Problem definition and individual technical contribution.
Sec.2 (700 words) Teamwork and critical analysis of project management.
Sec.3 (400 words) Reflection on project outputs and critical analysis.

Assessment Criteria

Problem definition and individual technical contribution 25%				
Criteria	F	P	M	D
Analysis of the problem situation, the current solution space, and where this project solution fits in that space.	Insufficient coverage	Adequate description of the problem situation and where the solution fits.	Competent analysis of the problem situation with some reference to appropriate literature and/or best practices. Mentioning of the alternatives	Effective and insightful analysis supported by references to appropriate literature and/or best practices specific to the problem. Discussion of alternatives.
Discussion of aims & objectives for the project outlining responsibilities & objectives for delivering your part of the solution.	Insufficient, little indication of personal responsibility.	Sufficient list of aims, indication of personal responsibility.	Competent set of aims, details of personal responsibility. Evidence that the responsibilities were recorded during the project.	Comprehensive set of highly appropriate and challenging aims. Clear detailed responsibilities that were recorded throughout the project. Thinking of stakeholders.
Awareness legal/ethical/ professional/social issues.	Insufficient awareness	Some awareness where appropriate.	A reasonable awareness where appropriate. Discussion of most issues applicable to the project	A good awareness where appropriate. Professional awareness and discussion of all (within reason) issues applicable to the project.

Teamwork and critical analysis of project management. 50%				
Provides an evaluation of the approach, tools & techniques used to manage the project and achieve team collaboration.	Little/no evaluation of the effectiveness	Adequate evaluation with sufficient consideration of the effectiveness	Competent evaluation with reasonable reflection on the effectiveness.	Insightful evaluation with detailed non-generic reflection on the effectiveness.
Provides a reflection on what you have learnt from the management of the project.	inadequate discussion of you have learnt from the project	Adequate discussion of what you have learnt from the project	Competent reflection, includes how this has developed your skills	Insightful reflection. With suggestions for improvements. Includes how this has developed your subject specific and transferable skills

Reflection on project outputs and critical analysis 25%				
Criteria	F	P	M	D
Provides an **evaluation of the approach, tools & techniques used** to deliver the solution and to ensure it meets the needs of the various stakeholders	Little/no evaluation of the effectiveness	Adequate evaluation with sufficient consideration of the effectiveness	Competent evaluation with reasonable, evidenced, reflection on the effectiveness.	Insightful evaluation with detailed, non generic, evidenced, reflection on the effectiveness.
Provides a summary of the **testing strategy and results** to show to what extent your part of the solution meets the functional and non-functional requirements	Insufficient summary of test strategy / results	Adequate summary showing testing of user requirements	Competent summary of testing. Considers various stakeholders.	Comprehensive summary of testing. Considers various stakeholders.

Help and Support

Help and support during the assessment will be provided by the supervisor alongside any general help classes provided in the school for summer students.

Feedback

Feedback will be provided within 4 weeks of submission and will be useful for dissertation modules.
